

Vanguard B2B List — Delivery Standard

Fictional / illustrative only — not a real client export.

What's included (typical columns)

- Company name + website
- Decision-maker name + title (when publicly available)
- Best-available email + phone
- City / state / country (as scoped)
- Source URL or sourcing note (audit-friendly)

QA pass (every delivery)

- ICP + geography matched to your brief
- Dedupe within batch
- Remove obvious placeholders / generic junk where applicable
- Consistent column headers for import
- Google Sheet + CSV export

What I don't guarantee

- Personal email on every row (varies by industry/site)
- Zero bounce / 100% verified (catch-all domains exist)
- Outreach or sending on your behalf

Recommended start

15-row paid pilot (Starter tier) → you approve → scale to 50/100 rows.

Delivery timeline

Per tier after requirements received: Starter 2 days · Standard 5 days · Advanced 7 days.
